

<b>Presentation</b>				<b>Abstr. #</b>
posters 1	Inga	<b>Bonath</b>	The involvement of protein S100A1 in heart disease	1, 9
posters 1	Stefan	<b>Donath</b>	ARC is required for cardioprotection in response to biomechanical and ischemic stress	20
posters 1	Ludwig	<b>Neyses</b>	A novel mode of cardiac calcium signalling	52
posters 1	Claire	<b>Murigande</b>	TNF- $\alpha$ and IGF-1 decrease MAFbx mRNA expression and increase cell viability through different pathways in adult rat cardiomyocytes .	50, 61
posters 1	Gabriele	<b>Ackermann</b>	The role of s100A1 in cardiac arrhythmias uncovered by using a mouse knock-out model	1, 9, 42,
posters 1	Cathrine	<b>Husberg</b>	Differential regulation of genes encoding contractile proteins during development of heart failure after myocardial infarction in mice	33
posters 1	Britta	<b>Husse</b>	Strain-induced CREB activation by different signaling pathways in cardiac fibroblasts	34
posters 1	Kathrina	<b>Bicknell</b>	Cyclin-dependent kinase inhibitor P27 plays a crucial role in regulating the induction of cardiomyocyte hypertrophy	6
posters 2	Mara	<b>Brancaccio</b>	Melusin and chp-1, new stress regulated chord containing proteins	10, 11, 55
posters 2	Christine	<b>Munding</b>	Leonin, a novel zinc finger protein involved in cardiac hypertrophy?	49
posters 2	Sibylle	<b>Wenzel</b>	Throughout PI 3-kinase isoforms: a specificity for the angiotensin II- and the $\alpha$ -adrenoceptor-mediated signalling pathways	81
posters 2	Melanie	<b>Boerries</b>	The Ca <sup>2+</sup> -dependent interaction of S100A1 with the F1-ATPase leads to an increased ATP content in cardiomyocytes	8
posters 2	Christian	<b>Zuppinger</b>	Sub-apoptotic doses of doxorubicin cause inhibition of proteasome activity, polyubiquitin accumulation and myofibril degradation in adult ventricular cardiomyocytes	57, 78, 79, 84
posters 2	Silvia	<b>Meili-Butz</b>	Dimethyl fumarate inhibits nuclear entry of nuclear factor- $\kappa$ B in rat heart endothelial cells and reduces myocardial infarct size in rats in vivo	46
posters 2	Isabelle	<b>Plaisance</b>	TNF- $\alpha$ and IGF-1 induce protein synthesis in C2C12 cells in a PI3Kinase-dependent and independent manner, respectively	50, 61
posters 2	Alexandra	<b>Finsen</b>	Syndecan-4 is an essential signal transducer for development of myocardial hypertrophy during pressure overload in mice	23, 33
posters 2	Liudmila	<b>Polonchuk</b>	The pro-arrhythmic potential of terfenadine and dofetilide is revealed in a rabbit model of heart failure	62
posters 2	Henning	<b>Witt</b>	Plakoglobin-deficient mice: a model for ventricular dysfunction in ARVC	68
posters 2	Malgorzata	<b>Tokarska-Schlattner</b>	Creatine Kinase system as target of anthracycline cardiotoxic action - Evidences from different complexity levels.	79
posters 3	Preeti	<b>Ahuja</b>	What blocks cytokinesis in adult and diseased heart?	3, 39
posters 3	Jacqueline	<b>Heger</b>	SMAD and AP1 signaling are crucial for apoptosis induction in cardiomyocytes	32

<b>Presentation</b>				<b>Abstr. #</b>
posters 3	Pierre	<b>Philip-Couder</b>	Expression profile of KATP channel in neonatal cardiomyocytes: association with forkhead transcription factor	36, <b>59</b> ,
posters 3	Philippe	<b>Beauchamp</b>	Relative contributions of connexin 40 and 43 to atrial impulse propagation in synthetic strands of neonatal and fetal murine cardiomyocytes	<b>5</b>
posters 3	Philipp	<b>Sasse</b>	Pacemaking and excitation-contraction coupling in early embryonic cardiomyocytes	<b>69</b>
posters 3	Alessandra	<b>Tessari</b>	Genetic analysis of the role of Pitx2 in cardiac morphogenesis and disease.	<b>77</b>
posters 3	Guillaume	<b>Gary-Bobo</b>	Focal myocardial lesions and heart failure induced by mosaic deletion of SRF transcription during post-natal development.	<b>27, 54</b>
posters 3	Thiemo	<b>Irtel</b>	Electrical propagation around a pivot point in patterned cultures of neonatal rat cardiomyocytes	<b>35</b>
posters 3	Andrea	<b>Domenighetti</b>	Modulation of notch signaling during the development of cardiac hypertrophy in mice	1, 15, <b>19</b> , 64
posters 4	Susanne	<b>Proksch</b>	Spontaneously beating myocytes derived from skeletal muscle generate calcium and sodium-dependent action potentials	<b>63</b>
posters 4	Pasquale	<b>Gallo</b>	Human embryonic stem cell (hESC)-derived cardiomyocyte (CMCs)	13, <b>26</b>
posters 4	Natalia	<b>Rozwadowska</b>	Myoblast cells characteristics implicate their distinct pattern from cardiomyocytes, however, does not preclude their function in myocardium	41, <b>67</b>
posters 4	Philippe	<b>Grisel</b>	Cardiac regeneration in the MRL mouse ?	<b>31,45</b>
posters 4	Giancarlo	<b>Forte</b>	Involvement of stem cells in myocardial development and disease: role of the hepatocyte growth factor	<b>25</b>
posters 4	Fikru	<b>Belema</b>	Activation of myogenic differentiation in adult stem cells (mBM-MASCs) by different signaling molecules and epigenetic reprogramming	<b>5a, 44</b>
posters 4	Mohamed	<b>Nemir</b>	Notch signaling controls cardiogenesis in embryonic stem cells	15, 19, 43, <b>51</b> ,
posters 4	Otmar	<b>Pfister</b>	In vitro expansion of cardiac side population cells is feasible and does not compromise their cardiomyogenic potential	<b>58</b>
posters 4	Andrea	<b>Meinhardt</b>	Label retaining cells in the adult mouse heart	<b>45</b>
posters 4	Nathalie	<b>Rosenblatt-Velin</b>	Role of the stem cell antigen-1 in the maintenance and self renewal of cardiac precursors in the heart	15, 19, <b>65</b> ,
posters 4	Nadire	<b>Ali</b>	Human and mouse cardiomyogenesis from embryonic stem cells and measurement of pharmacological responses	<b>4</b>
posters 5	Marlene	<b>Decker</b>	Distribution of myosin binding protein-c (mybp-c) domains, myofibrillar remodeling and contractile function	<b>17</b>
posters 5	Ronald	<b>Driesen</b>	Myocardial hibernation and cardiomyocyte remodeling	<b>21</b>
posters 5	Martina	<b>Krueger</b>	Perinatal switching of titin-isoform size and titin-based stiffness is not a general property of mammalian hearts but a species-specific event	<b>40</b>

<b>Presentation</b>				<b>Abstr. #</b>
posters 5	Stephan	<b>Lange</b>	Structure and functions of the myomesin C-terminus: new insights into the M-band	<b>42,</b>
posters 5	Roman	<b>Schoenauer</b>	Myomesin 3, a novel component of striated muscle	<b>2, 74</b>
posters 5	Laura	<b>Pentassuglia</b>	ERBB2 but not ERBB1/EGFR is critically important for the myofibrillar structure of adult ventricular myocytes	<b>57, 78, 84</b>
posters 5	Francesco	<b>Timolati</b>	Neuregulin-1 beta reduces doxorubicin-induced oxidative stress and alterations of EC-coupling in adult cardiomyocytes	<b>57, 78</b>
posters 5	Aneta	<b>Skwarek-Maruszewska</b>	Regulation of actin dynamics in cardiomyocytes	<b>76</b>
posters 5	Stephanie	<b>Weinert</b>	Impaired myofibril maturation in titin M-line deficient mice leads to cardiac dysfunction and embryonic lethality	<b>82</b>
posters 6	Frank	<b>Pillekamp</b>	Electrical integration of human embryonic stem cell-derived cardiomyocytes into murine ventricular tissue slices	<b>60</b>
posters 6	Maciej	<b>Kurpisz</b>	Can human myoblast replace cardiomyocyte atrophy in post infarction heart?!	<b>41, 67</b>
posters 6	Erman	<b>Pektok</b>	Autologous peripheral CD34+ stem cell transplantation in patients with end-stage ischemic heart failure: mid-term results fo a prospective clinical study	<b>56</b>
posters 6	Marie-Noëlle	<b>Giraud</b>	Hydrogel based engineered skeletal muscle graft (ESMG) improved heart function after myocardial infarction	<b>29,</b>
posters 6	Alessandra	<b>Martire</b>	Peripheral injection of mesenchymal adult stem cells prevents left atrium dilatation and improves cardiac function in MCP-1-induced cardiomyopathy	<b>44,</b>
posters 6	Mario	<b>Lepore</b>	Generation of a genetic model of inducible heart failure using a tetracycline-regulated system	<b>43, 64</b>
posters 6	Christine	<b>Gonzales</b>	Generation of a genetic model of inducible heart failure using a tetracycline-regulated system
